Is this for the south or north branch of the river? What marina are they launching from?

Ross

Naren-

The surveyor called this morning. They are mobilizing to the site this morning, and will begin work with the sidescan sonar today. They plan to work a long day today, and depending on weather and data collection progress, finish on-water work (sidescan and multi-beam) tomorrow or Friday.

I will let you know when the field work is complete. Please let me know if you have any questions.

Thanks,
Sarah

Subject: RE: Hydrographic surveyor of Chicago River - UPDATE

We just found out over the weekend that, due to a personal issue with one of the surveyors, the hydrographic survey at North Station will be postponed to next week. It will probably start Tuesday or Wednesday but Sarah and I will keep you posted.

Thanks,
Naren

I don't think so. But you can call Sarah 773.339.3134 if you have any questions about fieldwork.

Any of the field crew we can contact while we're out there? Ross

"Prasad, Narendra M" ---01/14/2013 11:14:01 AM---You should be able to see the work from land-side. I would think your best bet is from the sidewalk

You should be able to see the work from land-side. I would think your best bet is from the sidewalk over the Halsted bridge.

Subject: Hydrographic surveyor of Chicago River

Ross/Dave,

NRT's sub, American Surveying & Engineering, will be performing a hydrographic survey near North Station on starting on January 28 running 2 to 4 days.

Please note, their insurance does not allow non-employees on their boats; as such we're not planning on having anyone "on the water" with them.

Thanks,
Naren
